

How to Run the New Pre-Service Announcements Google Slide Show

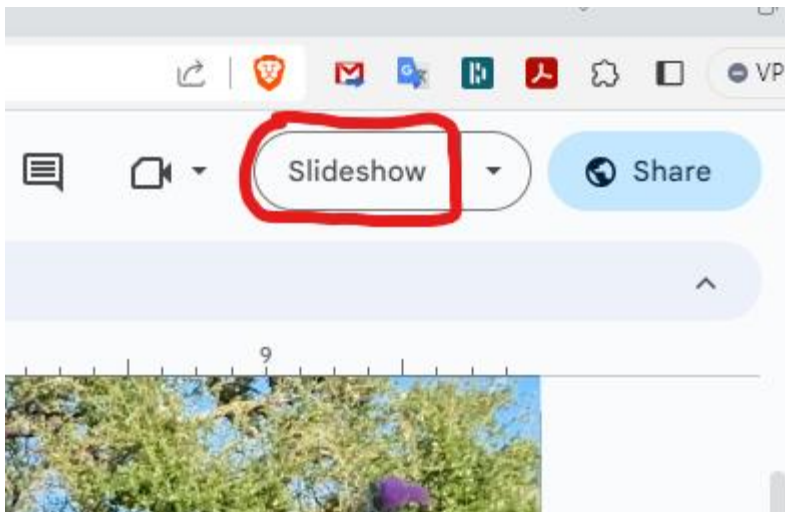

We have recently merged the pre-service PowerPoint Announcement slides and the Google What's Happening slides into a single Google slide show. You will no longer see a separate PowerPoint deck of Announcement slides. Here are step-by-step instructions to start and play the new Google slide show:

To start this Google slide show:

1. Double-Click on the New Announcement Slide Show icon.

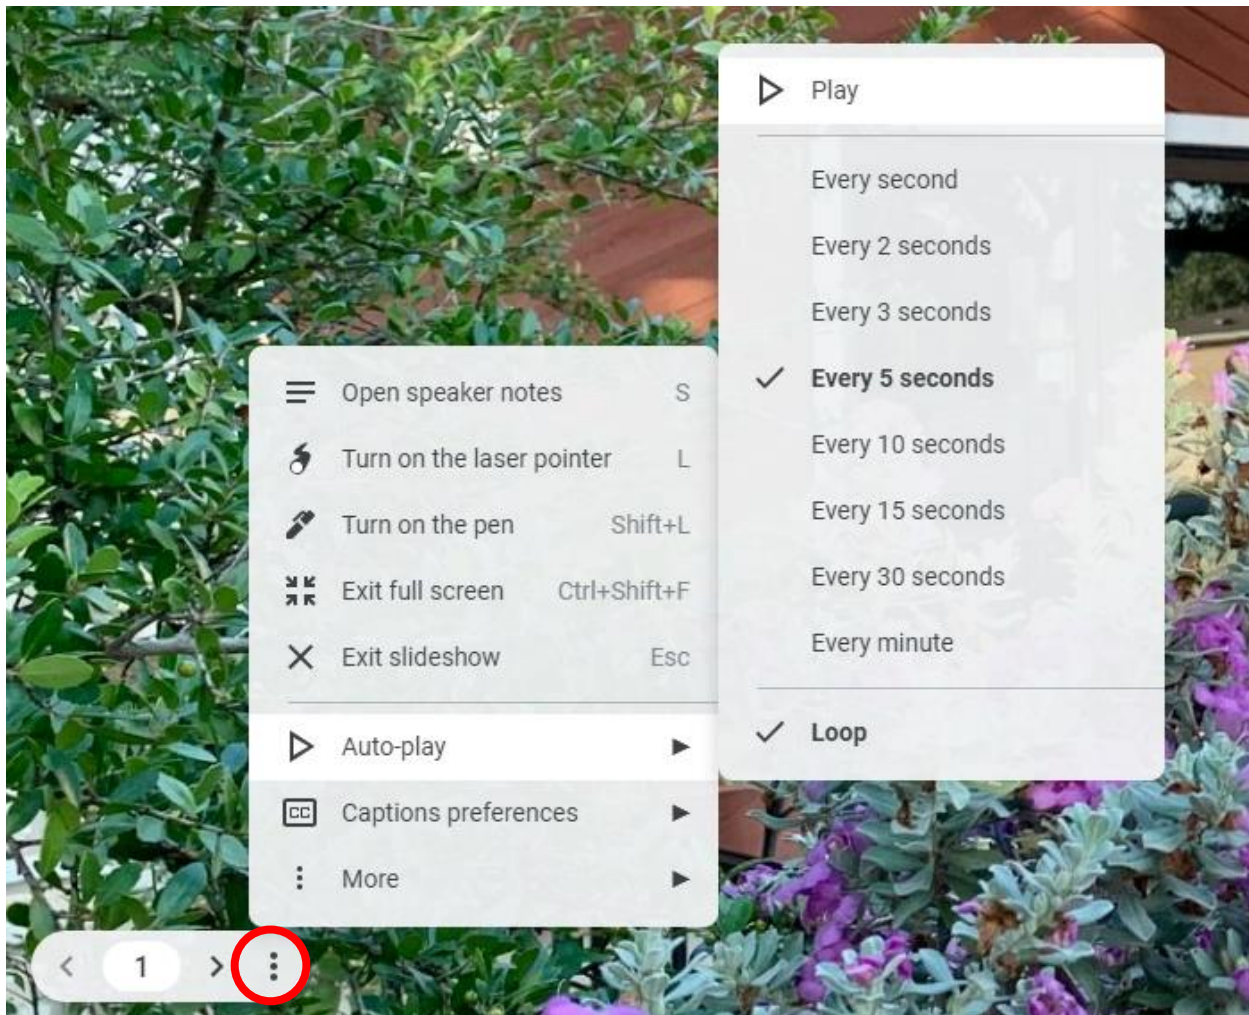

2. Click on the oval Slide Show button (**NOT** the down arrow) in the upper **RH** corner.

3. Move your cursor to the bottom **LH** corner of the screen. You should see a white oval:

4. Click on the three dots at the RH end of the white oval to open the options menu.
5. Select **Auto-play**, then **Loop**, then **Every 5 seconds** and **Play**.

The slide show should start and play a new slide every 5 seconds. To end the slideshow, hit Escape. Then minimize (-) or dismiss (Red X).

You may want to practice a couple of times to get the hang of it.

The worship slides are unchanged. They are still the usual PowerPoint slide deck.
